### CONCRETE

• If you are building your shed on a concrete foundation see the following page.

### **CONCRETE FOUNDATION**

Your kit contains all materials to construct a wooden floor. If you choose to install your kit on a concrete slab refer to the diagram below.

Allow new concrete slabs to cure for at least seven (7) days.

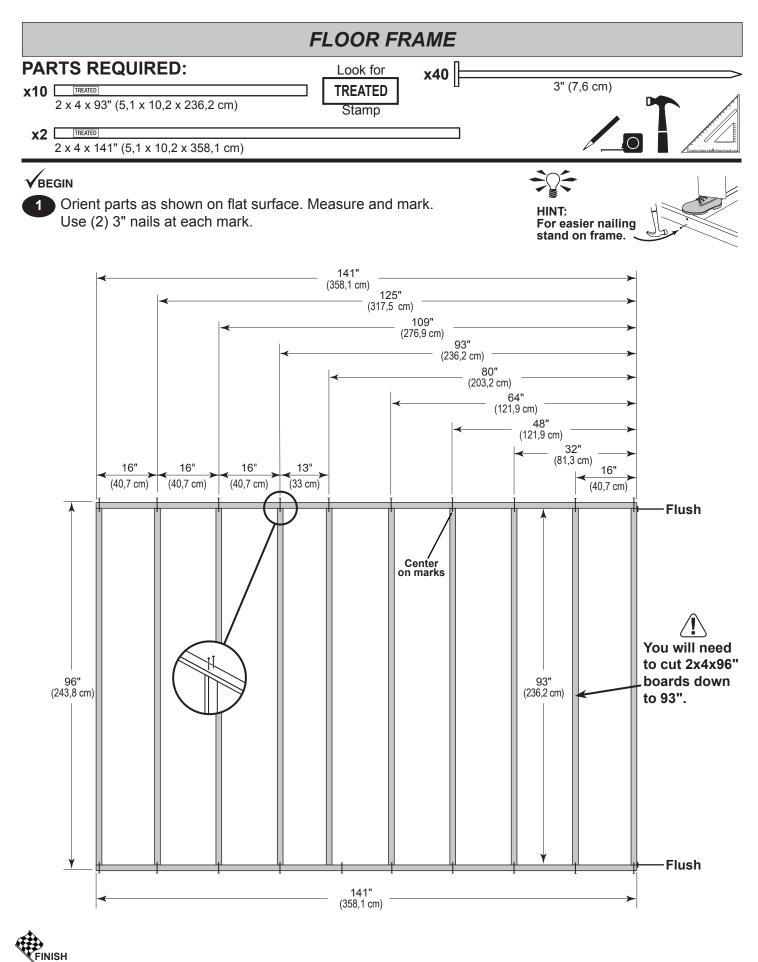

• A treated 2 x 4 (5,1 x 10,2 cm) sill plate is required when installing your shed on concrete. **Hint: Use treated lumber in your kit or purchase full length treated lumber.** 

• Use a high quality exterior grade caulk beneath all sill plates.

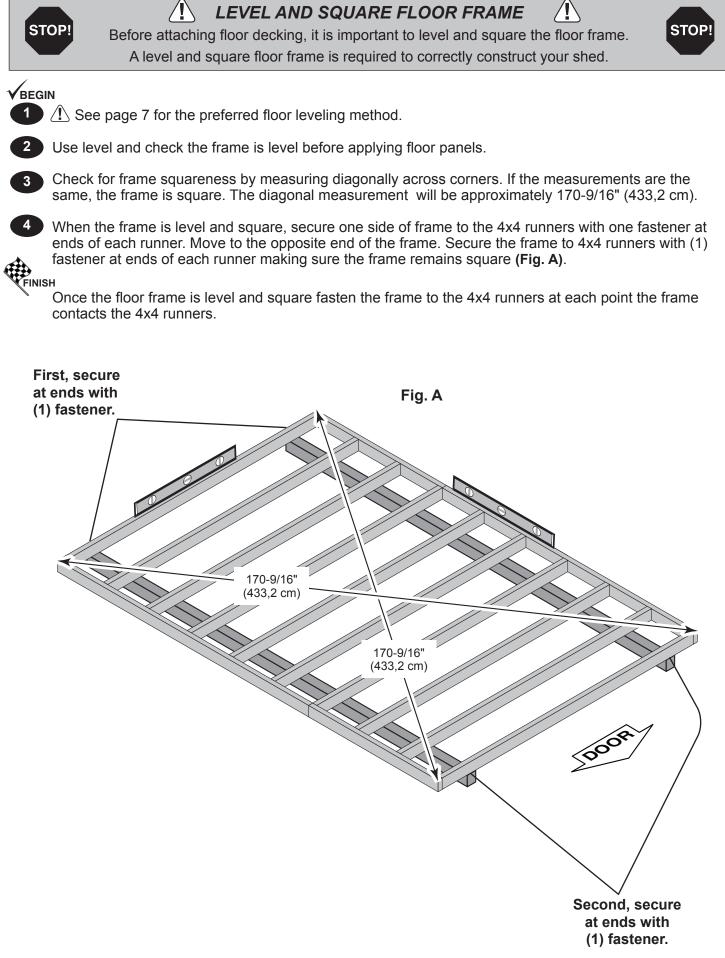

• Fasten 2 x 4 (5,1 x 10,2 cm) sill plates to slab using approved concrete anchors (fasteners not included).

Check local code for concrete foundation requirements.
